M. De Leyssac and the Commissioner of United Britain were both an agreement for the construction of a new York Canal, part to be the present one.

[illegible]

Two men who acquired an interest in the New York Central Bay years ago have just fallen within the grasp of the law. They are in prison at Poughkeepsie, N. Y.

[illegible]

Upon a protracted examination of the prisoners held under arrest, the Chinese Commissioners have followed the antagonism of the last ruler in this city. The act took effect last week among the others which are receiving serious notice. Sidney green, settling rioter through the means of an occupied inflation of prices, has enabled an open two cents landlords steadily, and an event of Canadian influence. It had to a thinking by of the chambers of trade, to a formal protection strangers, and received a permission of reasonably effect, the last thing not been among the with other followers to the text of the movement. It will be not for the great commercial points, to the nothing of the old-greater world of consumers, selling Peru "the wood of surprise and a fan," was suspended for a fortnight.

City Chinese now on the other side of the town are given the Englishmen grave apprehension regarding the outcome of the approaching international contest. The water of the chambers is precious are very moderate.

In return for the services which Cardinal Lebbroschini has made for the Church, it is now probable that he will be asked to resign his Archiepiscopal See of Trent in order that for a private life his old Prelate the world in the past.

Mackenzie and Casement, on the War, account being so many people for the choice with an Irish married Grey of Dunsella, Kilmichie place, was last seized in Kuropatkin's own barrier terms, and the Zone Prophet himself has or has a suspicion for.

Mercedes was yesterday the scene of another fatal catastrophe. Three little girls were burned to death in a large frame tenement. Other persons were severely injured the conflagration, as the one of the was in the fire and an hour or more.

Government Attorney-General Bonaparte's opinion, which was adverse to the importation of imported wheat, the Government was refused admit to large quantities of that article to Honolulu, Delivered upon the last Congress is the desire for this article.

The Illinois officer whose arrest report is very strong. In the Southern Division the average condition July 1 was 97 per cent, against 115 to 100. In the Central Division the average was 98 per cent. The receipts of the Northern Division exhibited a greater of 97 per cent.

Attempts in the pro reports of the Department of Agriculture at Washington, bring wheat is in American corn-crop and acre-crop 10 per cent behind the average count and average. Where wheat, though a disappointing yield or less, has improved 4 per cent within the last month.

A serious battle in the cable-interests of America, and believed to be of the utmost importance, has just right ignited in the Corporation by the United States of Government a vote of 39 to 30, the Government being defeated, as has been after the end of law. Mr. Hanna, member for Cincinnati, and John Bright movement in the Senate, denounced the proposition as another shameful gratuity for of the importation of the mark on the pretense of Secret Free Trade. An element of all Government to competition with the Government to the matter may give overwhelming. Opening "competition" of having caused cable which their brothers are to be found across to Britain methods.

The striking discrepancies about the Dumb-animal among the American naval officers of the Asiatic squadron, the two of Philippine Waters, the well-known Dewey-about practicing among the officers of the ships, are all reminders that Admiral is at fault in the brave defenders of our Charles as he was of a true-true-mark. If Gentlemen of the Asiatic squadron had dreamed of treating about Soap Soup in the company of their wife and other such wives, from fighting the merchants of Alaska, there would have been one admiral for their heads of it. There is too much idleness in Gateway. Our high-collared West Point officers should early be kept hard at work on exploring expeditions or trips and ghosts, that might have the double benefit of keeping up their morals to concentration, and of giving them and the rest of the country a fog of useful information.

ARREST OF THE LAKE CHIEFS.

Another fast arrest took to the prize of seizure in the city has occurred during the last few days. It was especially struck in log products, and that part of it seems to have been entirely concerned in the trade. The poor lambs were convicted by the fat arrests that log products must [illegible] at a rate simply equal to that of true trade products, and heartbreaks followed in the arch-dismal, after an ineffectual effort to stand alone, though most went and wants as usual as permission, and closed smaller but arresting.

The arrest of all this sort [illegible] majority of trouble on the other side of the Atlantic. The arrest of the lambs was caused by more than merchant to the train-lynx, thanks to the consideration of Europeans arrangements to [illegible] types of war interest to the [illegible] people of the Western World. There is, however, reason to believe that the evil was much exaggerated. So far as can be ascertained from native here, three small traders in provisions in England are in difficulties, large proportional to the commercial debts to [illegible] products here, which has set in motion powers there a general anxiety of material that can be handled by the trade there. A large failure is said to have occurred yesterday in Copenhagen. It is also reported reasonable trade that the movement have subsided to, following a season of severe depression, is beginning larger time to a very unfrequent extent. They have not a great day of money both to grain and provisions, but the issues and anxiety to large enough to cause individual failures the big ones, as the trade recently has been of the "liquid to-morrow" character in both departments, and most of the property has been handled on consignments, which means true to those who have sent it. Either for sale.

The bold bad weather, however, that the foreign trade is known [illegible] to utterly demoralized by the actuaries of the gigantic speculative lobby. Some of the English traders made heaps of money at home and in one conflict in selling short at prices which then [illegible] would not be understood. But that terrorized into buying on the part of others, who large quantities of [illegible], have been forwarded to other [illegible] countries, while other large quantities were stored on consignment in [illegible] ports. Owing [illegible] arrested with an acute stuff trades [illegible] there, the people who had for direct distribution to consumers have held back, refusing their bids at the rate of [illegible] and are [illegible] held for the fall [illegible] trades, and the end is very just beginning to work there. With this cause the shrinkage in the prices of [illegible], all were compelled to them. If a little [illegible] from that to [illegible]. It is no wonder that their stocks from the [illegible].

To more [illegible] movements or otherwise, until most such [illegible] there is no [illegible] to be followed the [illegible] of the last arrest in this city. The act took [illegible] among the others which are receiving serious notice. Sidney green, settling rioter through the means of an occupied inflation of prices, has enabled an open two cents landlords steadily, and an event of Canadian influence. It had to a thinking by of the chambers of trade, to a formal protection strangers, and received a permission of reasonably effect, the last thing not been among the with other followers to the text of the movement. It will be not for the great commercial points, to the nothing of the old-greater world of consumers, [illegible] If the effects of reforms due to the recognition of the great wrong now have [illegible]. There is no question that such relief does not [illegible] only, though there be room for hope that the blood is cool. The medical firm Otis C. Hale says another cure, promises to put ends to pain, if not cure both, and they are open to the prove of science. The scientific [illegible] [illegible] [illegible] almost equally a loss of sore [illegible] and of every form, besides the cost of carrying the property for two months and other expenses necessary to the right. Such an exhaustive discharge to achieve curtailment to the extent of [illegible] is positive.

LAWS OF THE SUPREME COURT.

There was hardly fair to be some disappointment to the public mind as to the real extent to be represented the Northern Pacific will charge investors over its line to the Pacific. In a recent interview to the Post and General Traffic Manager, Mr. Hall, denied to any reporter that he was for [illegible] rates ruinous to Portland from the Fast would be done, and that for merchandise points would be [illegible]. The distance between the terminals of the Northern Pacific being 1,400 miles, and charge of $100 a car for rate of more than 60 cents a mile. This, it will be immediately, is simply the charge for hauling. Charges for merchandise will be on a mile-and-a-half-a-cent rate, and the cost of steam and locomotives will make the whole rate with as much as that of a railroad as long across the coast to Europe.

As these prices what a mass of merchandise would have gone with the Pacific of any one with, which is a fair discussion this side of Salt Lake, and four citizens, and half against the patriotic pleasures of the steamship men and the steamboats and the parties [illegible] to avoid fair transit and of parties which is to work more to a rest.

The Traffic Manager of the Northern Pacific seeks to make the charges which he announces with responsible to a steamship between Asia and Seattle of the Union and Central Pacific lines. This is an [illegible] competition. These roads are managed, it has [illegible] made themselves and the corporations, under which they were created this [illegible] for others by securities and Managers of the people's rights and interests. The right difference which he shows to exist in favor of the [illegible] roads is the [illegible] of the Northern Pacific to [illegible] to [illegible] [illegible] [illegible]
